Re: New Telephone Service and 911

Please be advised that the installation of new telephone service must be completed in accordance with the following 911 Emergency Service connection instructions:

Your telephone service provider MUST be instructed to hookup to “PSAP-616”. (Public Service Answering Point 616).

This procedure will ensure that all emergency calls are properly routed directly to the police department at Picatinny Arsenal and not to another Town, County, or State Emergency Agency.

Once your phone service is in place, contact Officer Mary Lou Atkins at 973-724-6666. She will test your phone to make sure that when you dial 911, it rings at Picatinny Headquarters.

The undersigned has read and understands the instructions provided above.
